Conclusion

Individual Service User Feedback is an important element in of quality control within the Services provided by the Centre. This feedback is discussed at Team Meetings and Management Committee Meetings and will influence how we deliver our Services. We welcome the fact that our overall return rate for feedback across all services is 45%.

Once the Feedback is logged into the database we analyse it and decide if any actions are needed. Some of the comments asked us to do more publicity. We took this on board and decided to raise more awareness about the Centre and the services we provide. We have used our Facebook page more regularly to increase our reach and have attended a range of events promoting our services.

There has been a significant number of Service Users, 21 (34 last year) expressing an interest in feedback regarding their service user comments. Clearly we welcome this and will need to make an appropriate response.

In terms of our Facebook page the Centre has received 409 accumulated likes. Out of these 403 are following our page.

In addition to the above our HEY Services seek feedback from secondary pupils and teachers, these have all been very positive with over 786 pupils and 17 teachers submitting feedback.

In overall terms there was over 1001 sources of feedback relating to our Services during 2016/17.

We commend all Staff on the positive feedback from our Service Users. This highlights their commitment and the commitment of the Centre to quality Services. This quality is further recognised by Audits and Inspections from External Regulators which have all provided first class outcomes.
